

ATTENTION!
PLEASE READ

This label is to be removed **ONLY** by end user!

The warranty for this product is void unless the following procedures are completed before and during use of the Liquid Chalk Surfaces (LCS).

BEFORE USE

- 1.) Remove the plastic protective film from face of Liquid Chalk Surface(s) (LCS).
- 2.) Clean the Liquid Chalk Surface(s) using water and a mild soap (Palmolive®) with a clean soft cloth. After washing, dry surface(s) with a clean soft cloth.

DURING USE

- 3.) **USE ONLY EXPO® LOW ODOR DRY ERASE MARKERS.**
- 4.) Regular cleaning (once per week) of the LCS surface should be performed using Expo® cleaning solution. Use a soft clean cloth and wipe in a circular motion without applying excessive force. After washing, dry surface(s) with a clean soft cloth.
- 5.) Every month the LCS surface(s) should be cleaned using water and a mild soap (Palmolive®). Use a clean soft cloth and wipe in a circular motion without applying excessive force. After washing, dry surface(s) with a clean soft cloth.
- 6.) Every six (6) months the LCS surface(s) should be cleaned using a solution of eight (8) parts water and two (2) parts isopropyl alcohol. Use a soft clean cloth and wipe in a circular motion without applying excessive force. After washing, dry surface(s) with a clean soft cloth.
